A box plot comparing the distribution of the number of edges per node for three variables: λ , v , and \deg . The y-axis represents the count of edges, ranging from 0 to 10. The x-axis is labeled 'Variable'.

- λ :** The median is approximately 4. The interquartile range (IQR) is from approximately 3 to 5. The whiskers extend from approximately 2 to 7. There are several outliers above the upper whisker, with the highest reaching 10.
- v :** The median is approximately 4. The IQR is from approximately 3.5 to 5. The whiskers extend from approximately 2 to 6. There are several outliers above the upper whisker, with the highest reaching 7.
- \deg :** The median is approximately 10. The IQR is from approximately 9 to 11. The whiskers extend from approximately 8 to 12. There are several outliers above the upper whisker, with the highest reaching 15.

Box plot showing the distribution of 'Value' for three variables: λ , v , and deg . The y-axis represents 'Value' ranging from 0.5 to 2.0. The x-axis represents 'Variable'.

- λ :** Median is approximately 0.8. The box spans from approximately 0.75 to 0.88. Whiskers extend from approximately 0.5 to 1.0. Outliers are present at approximately 0.45, 0.5, 0.55, 0.6, 1.05, 1.1, 1.15, 1.2, 1.3, and 1.35.
- v :** Median is approximately 0.88. The box spans from approximately 0.85 to 0.92. Whiskers extend from approximately 0.75 to 1.0. Outliers are present at approximately 0.7, 0.75, 0.95, 1.0, and 1.05.
- deg :** Median is 2.0. The box spans from 2.0 to 2.0. Whiskers extend from 2.0 to 2.0. Outliers are present at 2.0.

Red dots highlight specific values: 0.5 for λ , 1.0 for v , and 2.0 for deg .
