A boxplot showing the distribution of four estimated parameters: λ , ν , α_1 , and α_2 . The x-axis is labeled 'Variable'. The y-axis represents the values of the parameters. The boxplots are white with black outlines. The median is indicated by a horizontal line within each box. The interquartile range (IQR) is the height of the box. The whiskers extend to the minimum and maximum values of the data, excluding outliers. Outliers are represented by black dots. A red dot is placed on the median line of each boxplot.

Variable	Median	Q1	Q3	Min	Max	Outliers
λ	~0.95	~0.95	~0.95	~0.95	~0.95	~1.00
ν	~0.95	~0.95	~0.95	~0.95	~0.95	~1.00
α_1	~0.95	~0.95	~0.95	~0.95	~0.95	~1.00
α_2	~0.95	~0.95	~0.95	~0.95	~0.95	~1.00

A boxplot showing the distribution of four estimated parameters: λ , ν , α_1 , and α_2 . The y-axis is labeled 'Value' and ranges from -10 to 5. The x-axis is labeled 'Variable'. The distributions are as follows:

- λ : A single red dot at approximately 4.0 with a horizontal error bar from 3.5 to 4.5.
- ν : A single red dot at approximately 1.5 with a horizontal error bar from 1.0 to 2.0.
- α_1 : A boxplot with a median near -1.0, a red dot at approximately -1.0, and several outliers below -2.0.
- α_2 : A boxplot with a median near -2.5, a red dot at approximately -2.0, and many outliers ranging from -5.0 to -12.0.
